I don't think we worked out how to organize the group yet, I don't think sub-committees are necessarily the best approach. I believe we need a more formal leadership board (i.e. president, secretary, events coordinator, etc.) at least for the first year, and I think it should be based on vote. Then, people who want to help out and work on specific things can, with the support and help of the leadership board. For example, instead of a sub-committee, someone with an idea can approach the right person in the leadership board and share the idea, and that person then has the contacts and means to set it up and organize it.

Organization of leadership needs to be discussed. I don't remember anyone agreeing to have sub-committees and the two person leadership that is currently set up seems inefficient. I recommend having president, secretary, event coordinator, etc. positions.

Not sure if I have enough industry experience yet to contribute in a useful way.
